An Easy Way to Carry Your Stuff to the Pool!

You will need a beach, about 80 inches of ribbon or thin rope, essential swimming items

Step 1: Fold your towel in half lengthways, and then fold in half widthways so the ends are together.

Step 2: Place your items (such as swimsuit & sunscreen) on top, in the middle of the towel.

Step 3: Roll up the towel from the folded end.

Step 4: Tie the rope or ribbon around one end of the towel roll, before tying into a bow. Now keep pulling one loop of the bow through so there is just one loop. Pull tightly.

Step 5: Take the long end of the rope and wrap it around the other end of the towel. Tie it once.

Step 6: Pull this tie REALLY TIGHT and place the roll diagonally across your body with the loop side down by your hip and the longer end over your shoulder.

Step 7: Thread the longer length of ribbon through the loop near the hip, tie into a bow so it can be easily pulled to undo. You're now ready to walk or bike to the pool, beach or picnic.

DIY GARDEN SUNCATCHER WIND CHIME

After you gather flowers on a nature walk, assemble your tools

HERE'S WHAT YOU WILL NEED:

Glue	Clear contact paper
Scissors	Flower blooms and petals
Canning jar rings	Ribbon

Note: Flower buds and petals that are not very thick work best. Keep that in mind as you pick your flowers.

HOW TO MAKE YOUR SUN CATCHER

- Cut squares of clear contact paper that is slightly larger than the diameter of the canning jar ring. You will need two squares of contact paper for each canning jar ring.
- Draw a circle shape on the contact paper. Place the canning jar ring on the center of the contact paper square. With a pencil or marker draw around the outside edge of the ring. This will be your boundary line so you know where your flower petals will go.
- Take the contact paper off of the paper backing and put the sticky side up on your work surface. **Tip:** To make it easier for small children, you can bend each of the little corners back and stick them onto the countertop. Then the paper will not shift around.
- Place the flowers and/or leaves face down on the sticky side of the contact paper, inside the circle. **Tip:** Cut off any extra portions of the flower that make them thicker. You can pull petals off the flowers and just use the petals, too.

- Use a second square of contact paper to cover the flowers.
- Press and work on the paper to get out the bubbles and seal it as well as possible.
- Cut out on the circle marking. You will need to trim off about a 16th of an inch all the way around inside of the line in order to have the contact paper circle fit inside the canning jar ring. You can add a bead of glue around the inside rim of the lid to make sure it is secure. Make sure you let the glue dry before hanging.
- Punch or cut a hole at the top. Use a hole punch to punch a hole about a half inch from the edge of the circle. This will be used later to place a ribbon through to hang it up. **Tip:** If the hole punch can't punch a hole through two layers of contact paper you can clip out a hole with a scissors.
- Take a ribbon and thread it through the hole that you made at the top of your contact paper circle. Tie the ribbon together over the top of the branch so your flower garden suncatcher is facing forward.
- Repeat to make as many of the rings as you would like to hang up.
- Find a stick to make a wind chime. A stick that is about a foot-long and fairly straight but still interesting looking.
- Use the same ribbon to make a hanger for your project. Tie the ribbon on one end of the stick and then loop it to the other end of the stick.
- Check the length of the ribbon to make sure you like the way that it looks and the way that the wind chime will hang. Then tie the other end of the ribbon to the other end of the stick.
- Hang your DIY Garden Suncatcher Wind Chime in a sunny window.

LIKE PUZZLES? Then you 'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

HERE'S HOW IT WORKS:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

9	8	3	1	2	7	4	5	6
5	7	1	8	6	4	3	9	2
6	4	2	5	3	9	1	8	7
4	6	5	2	9	3	8	7	1
8	2	9	4	7	1	5	6	3
3	1	7	6	8	5	9	2	4
7	3	4	6	5	2	9	1	8
1	6	8	4	7	6	2	3	5
2	5	9	3	1	8	4	7	6
