WHAT IS HOSPICE CARE?

Palliative/hospice is a special concept of care designed to provide comfort and support compassionately to patients and their families when a life limiting illness no longer responds to cure-oriented treatment.

SUPPORT, COMFORT AND GUIDANCE

Hospice care neither prolongs life nor hastens death, but focuses rather on the quality of life. The goal of hospice is to provide support, comfort, and guidance with an emphasis on dignity.

Enjoy the best possible quality of life

Have their values and wishes honored

Experience dignity in their care

Receive care in their environment of choice

Know what to expect

Receive continued support
