Schmidt presenting at our chapter meeting last January

Back by popular demand! Dr. Susan Schmidt, A.U.D., CCC-A, of Southwest Balance Dizziness & Ear Institute. Her presentation is entitled "New Treatment for Balance Disorders and Dizziness."

Schmidt will discuss testing that has been available in the past and new innovations in testing that is available today. Due to these innovations we can determine precise areas of the balance system that is impaired.

Research over the years has shown a certain type of treatment has been effective for certain types of dizziness and now this treatment has been adapted to be effective for many more patients.

Susan Schmidt, AuD, began practicing as an audiologist specializing in balance testing over 23 years ago. She has been testing those patients with dizziness and balance disorders to find the causes of their symptoms. Now she can find the causes AND treat these patients which has been very rewarding. Also, throughout her career, she noticed that there was a gap in the field of audiology for treating those with tinnitus. She used her first degree in psychology and her current degree to treat these patients as well.

Pack a lunch for our Brown Bag session and we'll eat together and share information about different apps to make your smart phone work for your hearing loss, from 12:00 - 12:45 p.m. Our regular meeting and Dr. Schmidt's presentation starts at 1:00 p.m. The meeting ends at 2:30 p.m.

Meetings are free. The room is amplified and has an induction loop system. Captions are provided for the Brown Bag session and Dr. Schmidt's presentation.
